Installation Instructions

LED SLIM WALL PACK

A: Adjusting CCT and Wattage.

1. After the fixture is fixed (Step 9), adjust the CCT via a controlling switch as per your demand, with 3000K/ 4000K/ 5000K optional, as shown in below picture.
2. Adjust the wattage via a controlling knob as per your demand, with 3 settings optional, as shown in below picture.

B: Wall mount installation

1. Loosen the screws on the side of the radiator with an Allen wrench, and rotate the radiator to 90 degrees.

2. Use a screwdriver to remove the screws on the driver box cover and separate the driver box from the radiator.

3. Drill an installation holes at the bottom of light, paste the EVA mat.

4. Drill holes on the wall according to the locating plate.

5. Remove the screws from the fixture base, twist the quick mount plate clockwise and separate it from the fixture base.

6. Align the holes on the lamp base with the holes on the wall, and tighten the screws.

7. Fasten the radiator to the driver box and connect the wires properly.

8. Well organize the line and tighten the screws of the lamp base.
